Best practices for protecting your data center from disaster

vembu

Agenda

- Criterias for protecting a Data-center
- Achieving your objectives
- How Vembu ensures data protection?
- Live demo
- Q&A

Data-Center Protection Criteria

Prioritize your data protection plan

- | Data that requires frequent backups
- | Data that needs to be recovered quickly
- | Data that should be stored for long-term archival

How to define your disaster recovery objectives?

Identification of Risks/Threats

Analysing and Classifying Risks based on- Relative Weights

Defining & Prioritising the Resources/Process

Determining the Best Recovery Method

Evaluation of DR mechanisms

Achieving your DR objectives

Which one will help?

Activation Phase

Execution Phase

Reconstitution Phase

How Vembu helps ?

Vembu BDR Suite

VMware Backup & Replication

- Agentless Backup
- VM Replication
- GFS Retention

Hyper-V Backup

- Cluster support
- Quick VM Recovery
- Backup verification

Windows Image Backup

- Servers/ Workstations
- Bare Metal Restore
- Tape backup

Vembu BDR Suite

File & Application Backup

- On-premise
- Vembu Cloud
- Granular backups/recovery

G-Suite & Office 365 Backup (Beta)

- Mails
- Drive
- Cloud-to-cloud

Disaster Recovery

- Your own datacenter
- Vembu Cloud

New Features & Enhancements in v4.1

- ▶ Application-aware processing of Oracle databases running on VMware VMs
- ▶ Backup support for Hyper-V scale-out file server(SOFS)
- ▶ Introducing backup proxy for VMware Backups
- ▶ Hyper-V VM backup now uses Microsoft's native RCT to track changes
- ▶ Image Integrity Check is even more customizable

We have also addressed the customers reported issues and support issues in the previous version of vembu along with improved stability, performance & bug fixes.
